

Reproducibility

Reproducibility

What's reproducibility?

A different analyst re-performs the analysis with the same code and the same data and obtains the same result.

Reproducibility vs Repeatability vs Replicability

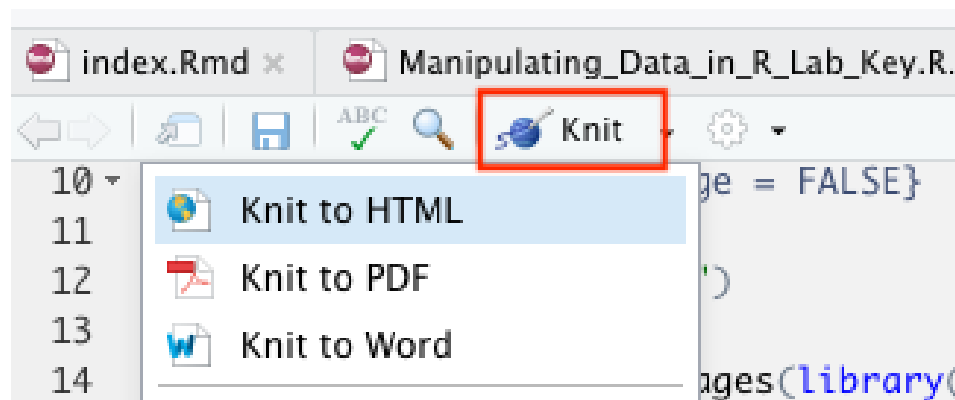

Based off of a figure from Essawy et al, 2020 <https://doi.org/10.1016/j.envsoft.2020.104753>

Reproducibility

- Clean your environment regularly
- Use RMarkdown
- Check the knit of your RMarkdown regularly
- Tell your future self and others what you did!
- Print session info!

RMarkdown

Clicking the knit button, will knit your document to create different types of reports. The default is html.

Code Chunks

```

```{r, echo = FALSE}
x<-2
```

```{r, eval = FALSE}
x<-2
```

```{r, message = FALSE}
x<-2
```

```

After knitting:

- 1) **echo** - determines if your code should be shown or not
 - TRUE = code is **shown** (default)
 - FALSE = code is not shown (but might be run...depends on eval)
- 2) **eval** - determines if your code should be evaluated (run) or not
 - TRUE = code is **run** (default)
 - FALSE = code is not run (but might be shown...depends on echo)
- 3) **message** = FALSE - suppresses messages when you run your code

RMarkdown syntax

Before:

```

# Header - biggest font created by hashtag and space
## SubHeader Second Biggest created by 2 hashtags and space

bold text
italicized text

`code` referenced outside of a chunk needs backticks

```

After knit:

```

Header - biggest font created by hashtag and space
SubHeader Second Biggest created by 2 hashtags and space
bold text italicized text
code referenced outside of a chunk needs backticks

```

RMarkdown syntax

Go to File > Help > Cheatsheets > R Markdown Cheatsheet

Final Project

Specific guidelines and example on website

Turn in through CoursePlus:

- 1) RMarkdown file
- 2) html file

Session Info

Ruby's session info print out

R version 4.0.2 (2020-06-22)

R version 4.0.2 vs 4.0.5

Different operating systems!

rmarkdown 2.4 vs 2.10

Avi's session info print out

R version 4.0.5 (2021-03-31)

Running under: macOS Big Sur 10.16

other attached packages: [1] rmarkdown_2.10

If Avi and Ruby have discrepancies in their results, the session info print out gives a record which may have clues to why that might be!

Session info helps

```
sessionInfo()
```

R version 4.2.0 (2022-04-22)
Platform: x86_64-pc-linux-gnu (64-bit)
Running under: Ubuntu 20.04.4 LTS

Matrix products: default

BLAS: /usr/lib/x86_64-linux-gnu/openblas-pthread/libblas.so.3

LAPACK: /usr/lib/x86_64-linux-gnu/openblas-pthread/liblapack.so.3

locale:

[1] LC_CTYPE=en_US.UTF-8 LC_NUMERIC=C
[3] LC_TIME=en_US.UTF-8 LC_COLLATE=en_US.UTF-8

DRY code

DRY

(https://web.archive.org/web/20131204221336/http://programmer.97things.oreilly.com/wiki/index.php/Don't_Repeat_Yourself) is an acronym: “Don’t repeat yourself” [@Smith2013].

“I hate code, and I want as little of it as possible in our product.” - Jack Diedrich

More resources

These are just some quick tips, for more information:

- The RMarkdown book (<https://bookdown.org/yihui/rmarkdown/>)
- Jenny Bryan’s organizational strategies (https://www.stat.ubc.ca/~jenny/STAT545A/block19_codeFormattingOrganization.html).
- Write efficient R code for science (<https://www.earthdatascience.org/courses/earth-analytics/automate-science-workflows/write-efficient-code-for-science-r/>).
- Reproducibility in Cancer Informatics course (https://jhudatascience.org/Reproducibility_in_Cancer_Informatics/introduction.html)
